About Us

M&A Technology is a leading provider of technology solutions for education, government and commercial customer since 1984. The company's success is attributed to its commitment to customer service and continued innovation.

Our Value Proposition

M&A's focus is on providing complete solutions to its customers, from product selection to delivery, followed by excellent support. We work closely with our customers to understand their unique requirements and then build a support plan to provide complete customer satisfaction. To handle our customer's requirements, we manufacture our own line of Desktop PC's, Servers, and other IT products in our 68,000 square foot manufacturing facility in Carrollton, Texas.

This enables us to control the customer's configuration and product life cycle. We have refined this customer-centric approach over the past 20 years to offer customer load management, asset tagging, customer specific configurations, quick turn product development, and extended product life cycles. These services are designed to reduce the total cost of ownership for school districts and government entities, increase end-user satisfaction, and enable our customer's to focus on their core business.

Our Value Proposition

1. ISO 9001-2000 certified manufacturing facility in Texas
2. Certified as State of Texas historically underutilized business (HUB) vendor
3. Certified by both the North Central Texas Regional Certification Agency (NCTRCA, SCTRCA) as a small business
4. Texas DIR Contract Number DIR-SDD-590
5. TCPN Contract Number R4721
6. BuyBoard Contract # 255-06
7. GSA Schedule #GS-35F-4038G
