

## M&A TECHNOLOGY

s o f t w a r e

Software applications hosted by M&A Technology use the web for multi-location software access. This type of access solves the communication dilemma that school district's experience each day.

By using M&A's web-based technology, schools are able to request technical assistance and create web pages for parents to access student information. In addition, districts can gather information electronically and provide online testing capability. Data Center management means less local interaction needed to support new and exciting technical solutions.

M&A is proud of its full line of excellent software solutions: e-Classroom Center, School Online Support, Web Survey and Quick Quiz. If you haven't had the opportunity of evaluating the other programs in the portfolio, we invite you to pay a visit to our website where all of them are available for your perusal.

Demos are available at:
